

xen-IP – Comprehensive Intellectual Property Management

xen-IP Comprehensive Intellectual Property Management

The xen-IP range of enterprise strength systems are designed to manage any combination of patent, trade mark, internet domain, design and similar IP data, including agreements and licensing information.

The xen-IP range consists of...

- xen-PAT (Patents/Designs)
- xen-TM (Trade Marks/Domains)
- xen-IP (both the above combined)
- xen-Comm (Agreements/Licences)

All features of xen-Comm are included in xen-PAT, xen-TM and xen-IP.

Low-cost “view only” versions of all the above are also available (xen-ProView and xen-CommView), as is a separate Internet Browser data viewer (xen-Web, see separate brochure).

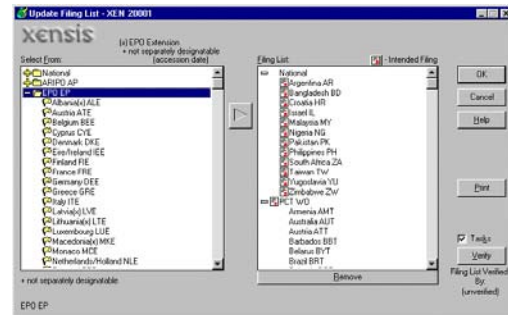

All products from the xen-IP range can easily manage from a single user to 100+ users at any physical location.

xen-IP is aimed at organisations that in addition to undertaking portfolio management may also file and prosecute. They may be organisations that have their own IP department using agents for local and/or overseas work, or they may be Private Practises working on behalf of clients.

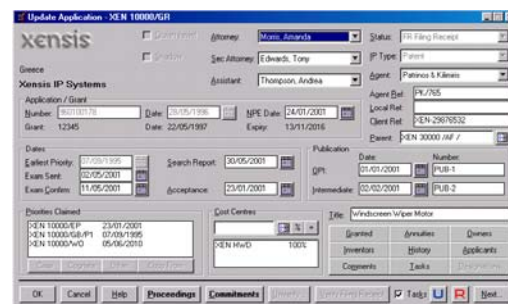

xen-IP can be used to manage all types of IP and related data for the entire property life-cycle, including...

- Proposals/Inventions
- Cases/Dockets
- Priority Applications

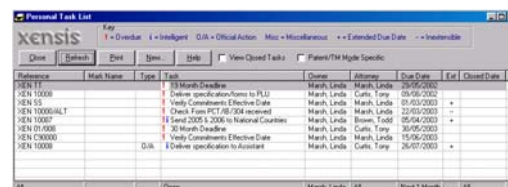

- Filing Lists for user-defined filing patterns/strategies...

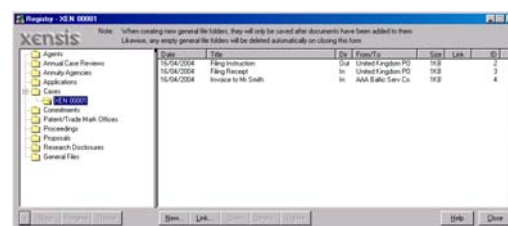

- National/derivative applications...

- Regional applications (PCT, EPO, OHIM, etc.), including National Phase Entry and TM Conversion
- Task/Diary system with tasks generated from user-defined IP/country specific profiles...

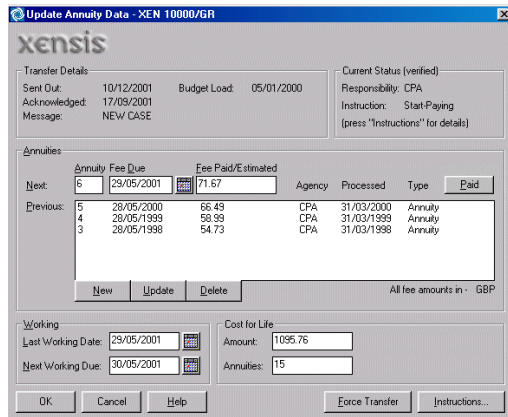

- Alerts feature to highlight critical data situations
- Commitments/Agreements with third parties (licensing in/out, etc.)
- Proceedings/Oppositions
- Document Registry to store documents linked to data...

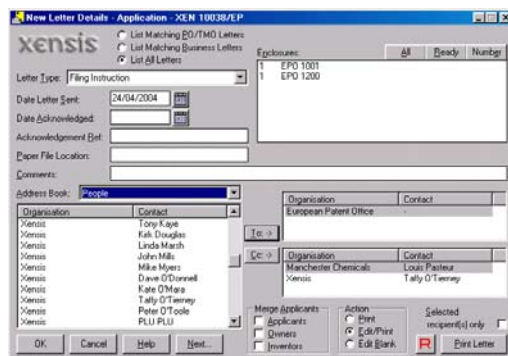

xen-IP – Comprehensive Intellectual Property Management

Additional Features

- Payments management including Deposit Accounts and Annuities (automated interfaces to major annuity agencies)...

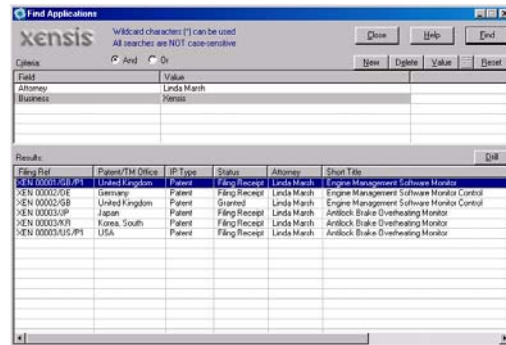

- Mailmerge facility to merge data into letters and official forms (eg. PCT Request, etc.)...

- Comprehensive reporting with around 100 reports, user-defined reports also available
- Supplied set of “User Views” to allow users to define their own reports using their favourite reporting tool
- The system records details for all internal and external bodies (eg. Patent/Trade Mark Offices, Businesses, Agents, etc.)
- Audit history stored for critical data
- Critical data is verified and locked to prevent accidental change
- Comprehensive access rights/roles
- Common database structure between all products in the range allows different user types to share

data (eg. Patent Dept and TM Dept can share the same database and cross-reference data)

- Comprehensive data “find” tool...

- Extensive Help System/Tutorial
- Seamless switching between Patent and TM data (xen-IP only)
- Industry standard databases supported (SQL Server or SQL Server Express (free))
